Subject: testimonial

Linda,

Both Wendy and myself would like to submit the testimonial for your use.

Since Wendy and I been trying to get pregnant we have had a rough experience trying to do so. Everywhere from miscarriages (3), which two were twins when trying with Jone's Institute and (2) ectopic pregnancies. After the second ectopic options were limited to invitro. We started looking for areas that did this type of procedure and that's when Wendy came across New Hope Center.

From start to current her staff has been stupendous in the care given, attention to patient needs and concerns. Unlike the Jone's Institute, not only has Dr. Robin called but also several members of her staff as well to check on patient status and well being. Martina (member of the staff) has gone above and beyond what I had expected to assist for Wendy needs and concerns.

Through Dr. Robin and her staff, we are now expecting twins (girls) and even though our prenatal care is being given elsewhere The New Hope Center still checks on her to see how she is doing, again more than I have expected.

Both Wendy and my experience at the New Hope Center has been by far the best. With all the added stress and concerns they have definitely gone to great lengths to make things as comfortable as possible, always there to assist and answer any questions or concerns.

At work several other people have asked concerning Invitro fertilization and my answer to them is always, The New Hope Center.

Thanks for all your help and guidance,
David and Wendy
