

HIV DISCLOSURE

A law was enacted in the Commonwealth of Virginia in 1989 which authorized healthcare providers to test their patients for HIV antibodies when the healthcare provider is exposed to bodily fluids of a patient in a matter which may transmit Human Immunodeficiency Virus (HIV). In the event of such exposure, you will be deemed to have consented to such testing and to have consented to the release of the test results to the healthcare provider who may have been exposed. You will be offered the opportunity for a face-to-face disclosure of the results of the HIV testing.
